couple ticket 860 EUR  
(learning experience, food, camping included)

**FOR WHOM?** Craftspeople, architects, builders and clients

**PARTICIPANT LIMIT:** max. 30 people

## PROGRAM:

**REGIO EARTH Summer School 2025 focuses  
on CLAY FINISHES and DECORATIVE TECHNIQUES.**

---

**Practical training over a 4-day period.**

**Suitable for participants with little or no experience,  
as well as for those at an advanced level.**

**Certified under the ECVET European credit system and  
includes specialized workshops in fine plasters, tadelakt,  
and wall decoration techniques.**

**Participants will have an option to obtain the ECVET  
level 2 certificate.**

**In addition to the ECVET course we will provide short  
workshops on earthen architecture, such as adobe  
making, cob wall techniques, straw bale construction,  
etc.**

**Students of REGIO EARTH Summer School have access  
to all accompanying events, including the ECO-Home  
conference and the REGIO EARTH Festival**

Launched in 2017, the REGIO EARTH Central and Southeastern European Earthen Architecture Festival is an international initiative uniting emerging earthen architecture communities across the region. Each year, these professional groups come together to offer several days of hands-on, practical learning. This format has evolved into what we now call a summer school, offering both theoretical knowledge and hands-on training led by highly skilled instructors in earthen construction techniques.

The primary language of the event is English, with constant interpretation provided in Hungarian.
